

WRITING INSTRUMENTS
THE COLLECTION

MAISON DE HAUTE ECRITURE

With its priceless legacy of expertise,
Caran d'Ache is keeping the art of writing
alive and well.

In the great Swiss manufacturing tradition, it works with
passion and rigor to create exceptional products.

Caran d'Ache writing instruments are recognised the world over for
their excellence and their daring combination of technology and aesthetics.

They are technical marvels that have a strong emotional appeal. By
combining originality in the use of materials with perfection of form
they make writing by hand a genuinely refined experience.

When you offer a Caran d'Ache luxury writing, drawing
instrument or accessory, you are choosing a
symbol of prestige and style that affirms your
love of beautiful things.

CARAN d'ACHE
OF SWITZERLAND

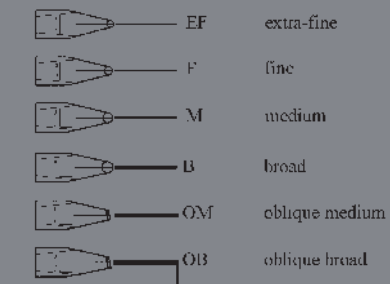

THE CARAN D'ACHE FOUNTAIN PEN: THE IDEAL INSTRUMENT FOR HANDWRITING

"The pen is the interpreter of the soul: what one thinks, the other expresses."
(Miguel de Cervantes)

Each Caran d'Ache writing instrument combines high technology with the
matchless expertise of the craftsman. The nib and the ink feed both receive
special attention and their secrets are carefully guarded.

From the machining of the ink-feed channel to the curvature and polishing of the
pen, Swiss precision gives these writing instruments the genuine stamp of
quality.

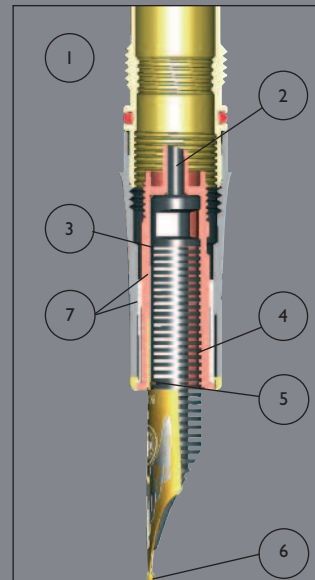

To offer personalized writing style and comfort, the nib of a fountain pen in the
Varius collection is available in six point sizes, and in three sizes in the other
collections.

For each pen reference
the sizes of available nibs
are shown in black:

The fountain pens are supplied with a piston pump and two blue Caran d'Ache
cartridges: the roller balls with a fine black cartridge, the ballpoint pens with a
black Goliath giant cartridge, and the mechanical pencils with leads of 0.7mm
diameter (except Ecridor XS: 0.5mm and Ecridor Artiste: 2mm).

1. Front parts of a fountain pen
2. Inkfeeder, an essential component for the
ink flow
3. Capillary ink-feed canal
4. Ribs to compensate for changes in
temperature and altitude
5. Air-ink exchanger system
6. Pen with welded and polished iridium ball
7. The house and the body of the nib
All parts of a Caran d'Ache writing block
are assembled manually.

Each Caran d'Ache pen block must pass
leakage, writing, and fast- writing tests.
The nibs are then adjusted and ground by
hand.

“SWISS MADE” SINCE 1924

Caran d’Ache, founded in 1924 by Arnold Schweitzer, was a product of Switzerland’s long history of watchmaking and jewellery manufacture. Today, it is the epitome of superior quality and recognized expertise.

The company is the country’s only manufacturer of pencils, fine-arts materials and luxury writing instruments. It is a symbol of Swiss technical excellence, precision, reliability and innovation.

Each product is created by hand in the Geneva workshops and brings together the traditional expertise of master craftsmen and the performance of computer-assisted machine tools.

Each Caran d’Ache pen carries the “Swiss Made” label. With its famous Goliath ballpoint cartridge it ensures perfect writing quality with a capacity of up to 600 A4 pages. A crucial part of its tradition of seeking perfection is its expertise in controlling the components of fountain pen blocks and the ink-feed system, whose secret is jealously guarded.

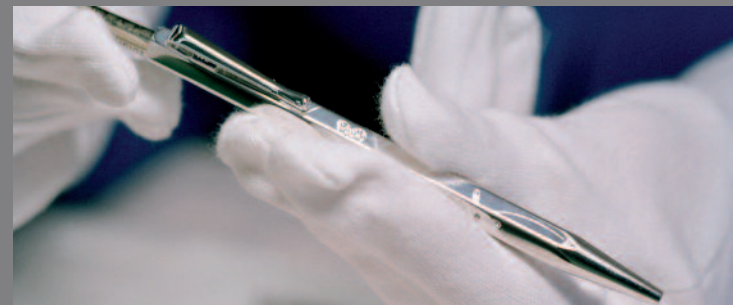

Writing instruments are tested individually and ensure a level of comfort in handwriting which only a Maison de Haute Ecriture can provide.

Lifetime guarantee* and after-sales service ensure the best for these exceptional instruments.

Lovers of handwriting often develop a real attachment to their pens. For this reason, our after-sales technicians do their very best to repair them whenever possible, only replacing them as a last resort. Repairs under guarantee are free of charge and other repairs are only carried out after the client has accepted a cost estimate.

Caran d’Ache writing instruments are created by hand, inspected and tested at each stage of production. When they leave the Geneva workshops they are in perfect condition and are guaranteed against any manufacturing defects. This international guarantee certificate accompanies each pen.

**For the majority of writing instruments in Caran d’Ache collections. Certain special editions are excluded.*

PERSONALISATION

Settings of precious stones, diamonds, rubies, sapphires, emeralds and engraved with a name, initials or even a short message....

Caran d'Ache offers all lovers of rare art objects the possibility of personalising their writing instrument.

They can order a personal design by choosing the noble metal and the colour, as well as the number of precious stones that will then be set by a Geneva jeweller.

Each personalised, unique writing instrument is numbered, engraved and delivered with its certificate.

HAND MADE FOR HANDWRITING

Caran d'Ache writing instruments demonstrate recognized expertise in working with different materials. Created by a large number of delicate operations and submitted to rigorous checking, they offer a level of refinement in the smallest details which is the mark of exceptional writing instruments. Using noble materials such as gold, silver, rhodium, platinum, Chinese lacquer and wood, or high-technology materials such as carbon fibre, Caran d'Ache's exclusive craftsmanship produces instruments that are very attractive both to the eye and the hand.

18-CARAT YELLOW GOLD / ROSE GOLD

Gold, the noblest of metals, brings an incomparable softness to a pen, and has inspired Caran d'Ache to design its most beautiful objects, in classical and contemporary styles. In the pure tradition of Swiss goldsmiths, craftsmen cut, decorate, engrave and polish the gold to dress each writing instrument and in so doing create real works of art. The gold they use is certified by the Office of Precious Metals and carries its hallmark, as well as the personal mark of the craftsman.

SILVER

Writing instruments in solid silver are controlled by the Federal Office of Precious Metals and carry its hallmark, as well as the personal mark of the craftsman. The silver used in silver-plated elements is 999/1000 fine.

PLATINUM

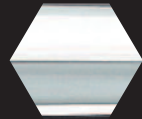

Platinum is a noble and precious grey-white metal used to protect some Caran d'Ache writing instruments, thus allowing them to keep their shine over the years. Its purity gives them a white lustre which enhances the magnificent diamonds. Rare, pure, unalterable, platinum is the most exclusive precious metal. Its rarity makes it a treasure much coveted by connoisseurs. Extremely resistant to corrosion, oxidation, abrasion and shine loss, it is perfectly suitable for jewellery and frequently used in this field.

RHODIUM

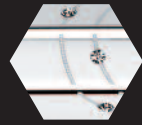

Rhodium is a rare metal in the platinum family and is about 10 times more expensive than gold. It is extremely hard but its principal advantage is that, because it does not oxidise, it always keeps its magnificent silver sheen. Rhodium is often used with silver to preserve its beautiful appearance.

Rosewood

CHINESE LACQUER

Caran d'Ache is proud to be one of the very few Western manufacturers of writing instruments to use this wonderful material. Blue, black or red Chinese lacquer gives a magnificent finish to lighters and writing instruments in the Hexagonal and Varius collections as well as some limited editions. Chinese lacquer is a natural product derived from the sap of the "Tsi-Chéou" tree. The highly complex art of preparing and applying it in the manner of the great Eastern masters has inspired the craftsmen of Caran d'Ache.

LACQUER

Lacquer is a precious, refined material that requires great care and attention in its application as well as its finishing. Polished repeatedly, it develops all its wonderful shine in the hands of a craftsman.

COAT OF MAIL

In its innovative use of coat of mail, Caran d'Ache has made the most of this legendary material that once protected medieval knights. Its woven links of stainless steel create a very pleasant texture in the writer's hand. Coat of mail even comes in a gold-plated version.

CARBON FIBRE

Carbon fibre is the epitome of a modern material. Its lightness and outstanding rigidity give it an immediate appeal and Caran d'Ache uses it to create a new, high-tech interpretation of tradition. Removed from its normal environment of top-level sports, and linked with silver-plated elements, carbon fibre brings power and strength to the Varius line.

ROSEWOOD

This wood comes from a tree in Brazil, the thinness of its veins, its hardness and its resistance make it a greatly prized wood among cabinetmakers.

HIGH STANDARDS AND RIGOUR IN THE CHOICE AND USE OF PRECIOUS MATERIALS

The gold, silver, platinum and rhodium used in our writing instruments all conform to the regulations concerning the use of precious metals. Manufacturing tolerances are strictly respected and each pen is individually inspected before being released for sale. Caran d'Ache works only with suppliers who meet strict conditions. All materials are carefully verified or analysed when they are received. Precious metals, gold, silver, platinum and rhodium are all conform to the regulations in force under Swiss law on working with precious metals.

"The pen is the interpreter of the soul: what one thinks, the other expresses."
(Miguel de Cervantes)

From the machining of the ink-feed channel to the curvature and polishing of the pen, Swiss precision gives these writing instruments the genuine stamp of quality.

EF extra-fine

Each Caran d'Ache pen block must pass leakage, writing, and fast- writing tests. The nibs are then adjusted and ground by hand.
