

All the Colours of Caran d'Ache
2014

E N G A G E M E N T

The health and safety of our employees and our customers is our first priority and is ensured mainly by the use of materials that have minimum impact on the environment.

Ecology

FSC® is the abbreviation of “Forest Stewardship Council”, a label guaranteeing that the wood used for the production of pencils complies with 10 principles upholding respect for forestry development, the rights of local populations and long-term socio-economic well-being of forestry workers.

Product safety through quality assurance

A strict quality control guarantees compliance of our products with all legal requirements and go even further than minimum requirements.

The CE symbol indicates that the product meets the principal European health and safety standards for products. Our products and their labelling conform to Directive 2009/48/CE on the safety of toys. Their design and manufacture are based on the harmonised standard EN 71, guaranteeing that the product conforms to toy safety legislation.

The AP (Approved Product) symbol indicates that the products have been evaluated by a qualified toxicologist to ensure that they conform to Federal and State legislation in the USA. This certification programme is backed by ACMI “Art and Creative Materials Institute”, an association that guarantees the safety of Fine Arts products in compliance with ASTM D4236.

These products contain no heavy metals or toxic materials. Their packaging is safe and presents no risks.

Production

Since the company was founded in 1915, the whole assortment of Caran d’Ache products is designed, developed and manufactured in Switzerland, in the Caran d’Ache workshops in general. With the “Swiss Made” label, we guarantee our demanding customers exceptional quality, high precision, unrivalled reliability, elegance and originality in the design and production of all our products.

Caran d’Ache is committed to a policy of sustainable development based on the choice of raw materials, energy savings, environmental management and the recovery of waste products.

For example, wood shavings are compressed into briquettes and used as fuel for the central heating system.

SUSTAINABLE DEVELOPMENT

The commitment that a Maison de Haute Ecriture has the duty to uphold.

Caran d’Ache has ensured respect for people, the environment, products and personal safety, which are key conditions for the companies development.

After the excellence of production, certified by the label ISO 9001 in 1996, it is today Caran d’Ache’s ethics and commitments in terms of sustainable development which are recognized with the obtention of the ISO 14001 certification.

Caran d’Ache is one of the few pencil producers with FSC® certification. Received in 2004, it covers not only our raw materials but our entire production process and workshops. All Caran d’Ache pencils are certified as made from wood that comes from strictly managed forests with guaranteed reforestation programmes.

The production of Caran d’Ache graphite pencils is exclusively made of 100% natural products. Pencil leads and coloured chalks are mainly made with natural components and binders. The pigments, mainly synthetic, meet all safety requirements. Pencil varnishes made with modified nitrocellulose do not contain plasticisers and are being progressively replaced by aqueous varnishes, thus reducing the use of solvents and their impact on the environment.

Caran d'Ache

Maison de Haute Écriture

Caran d'Ache, a love affair with Colour

With a worldwide reputation for the quality and beauty of its creations, Caran d'Ache applies its Swiss-made expertise to develop writing instruments and Fine-Arts products.

Born of the passion of its founder for Colour, the Maison has remained loyal to its roots. The pencils, pastels and paints that are designed, developed and manufactured entirely in the Geneva workshops, keep alive the tradition it holds so dear.

Caran d'Ache tells the story of a Swiss family business from the first pencil to its most recent creations. It has applied its precious inherited expertise to creating outstanding products just like Prismalo, the world's first water-soluble colour pencil launched in 1931, which revolutionised the world of design and colour.

Since its very beginning in 1915 and the official opening of the company in 1924 by Arnold Schweitzer, Caran d'Ache's development has been distinguished by its love of beautiful materials.

A never-ending journey through the world of Colour and exploring the most intense pigments, a few days at the heart of materials and an excursion into the universe of light, the Caran d'Ache expertise is a subtle combination of chemistry, science, innovation and creativity.

Sustainable development also plays its part when being a Maison de Haute Ecriture. Environmental quality and protection are an integral part of the manufacturing process with an ever increasing share for FSC®-certified products.

For more than eighty years, Caran d'Ache has inspired and supported several generations in exploring their emotions and their artistic sensitivity. Fantasy and easy-to-use for the Children's products as well as expertise and precision for products in the Fine-Arts range designed for amateurs, artists and design professionals. Each talent has total freedom of expression thanks to the range of Caran d'Ache palettes. Because writing is an expression of a unique style and because the writing of an artist is revealed in his pencil strokes, the Caran d'Ache products can be used and adapted at will.

At the service of the lovers of Colour, Caran d'Ache products allow an area of unlimited freedom to the imagination.

The name CARAN d'ACHE is rooted in the annals of art history. When Arnold Schweitzer founded the company in 1924, he named it after a famous French caricaturist of the Belle Époque, Emmanuel Poiré (1859-1909), whose work he admired.

He signed his works Caran d'Ache, a French transliteration of the Russian word for pencil "karandash".

The creations of Caran d'Ache in a few dates:

- 1929: Fixpencil®, the first metallic clutch pencil
- 1931: Prismalo®, the first water-soluble colour pencil
- 1952: Neocolor®, wax-pastels
- 1966: Fibralo®, fibber tip pens with water-based ink
- 1985: Neopastel®, the oil-pastels
- 1988: Supracolor® Soft, the watersoluble colour pencils
- 1990: Pablo®, the water-resistant colour pencils
- 1999: Neoart™ Aquarelle, extra-fine wax pastel
- 2003: Museum, the watercolour leads
- 2006: Graphite Line, products dedicated to the shades of black
- 2008: Luminance 6901®, the pencil which associates the highest lightfastness with the rich smoothness of a permanent lead
- 2010: Fancolor, products intended for young artists
- 2012: Pastel Pencils and Pastel Cubes, the extra-fine dry pastels
- 2013: Museum Aquarelle, extra-fine soft water-colour in pencil form

Artists and professionals

**Initially there is a style,
the writing of the artist,
his imprint, his identity.**

It takes shape and surges forth in the power of a pencil stroke, the softness of chalk or the harmony of a rubbed pastel.

Artists and professional designers, anyone expressing ideas through a sketch, an outline or a drawing needs the reassurance of a reliable, quality tool designed for them.

The fashion designer invokes a muslin in a delicate water colour, the draughtsman outlines his project with generous pastel brushstrokes, the art editor expresses an innovative concept with a few precise pencil lines, whilst the artist investigates variations of black in his studio.

Every professional develops a style, like an encounter narrated in the choice of a technique or a colour.

Accomplices at any moment or comrades-in-art, work instruments or pure objects of pleasure, the Caran d'Ache Fine-Arts products provide every single project with infinite possibilities of shades and materials.

Dedicated to creativity, technical and reliable, they are always the origins of emotion and inexhaustible sources of inspiration.

LUMINANCE 690I®

Smooth and permanent lead for artists and creative professionals

Lightfastness in compliance with the highest international standard: ASTM D-690I

Wide range of colours developed with a large variety of highly concentrated pigments

- Colour pencil for highest requirements: artists and creative professionals.
- 76 colours, available in separate colours.
- Lead: water-resistant, smooth with a maximal covering power and a high pigment concentration for bright and intense colours. Ø 3.8 mm.
- Lightfastness: Compliance with the highest international standards concerning colour pencils' lightfastness: ASTM D-690I.
- Shaft: round, 8 plys, end-sealed in the same colour as the lead, marked with colour name and code.
- Best cedar.
- Certified FSC® Forest Stewardship Council
- Product conforms to ASTM D4236 (AP for USA only).
- Techniques: Permanent and smooth lead particularly recommended for mixings and gradations, blendings and also shading and burnishing with a white pencil.

The colour pencil Luminance 690I is complementary with the other pencils of the Artist range, Pablo and Supracolor.

The smooth lead of Luminance 690I pencils requires the use of a well-sharpened pencil sharpener.

For colour availability and assortments, see colour chart.

The mark of responsible forestry

Full Blender-Bright

- A universal colourless oil and wax-based medium for mixing, blending and intensifying colours.
- Gloss effect and colour protection. It forms a waterproof coating and increases protection against UV.
- Hexagonal shape, economical to use – 100% of the blender can be used for a very wide choice of applications.
- Flexible use: sharpened like a pencil for detailed work or applied flat to cover large areas.
- Ideal complement to Caran d'Ache colour pencils, graphites and wax pastels.

Thought and produced in the respect of the environment

The rich smoothness of a permanent lead

Lightfastness compliance with the international ASTM D-690I standard

What do LFI and LFI II mean ?

ASTM D-690I

ΔE = quantifies the difference in colour between two sets of specimens before and after exposure to the light. Only colour pencils with the LFI or LFI II classification, ΔE ≤ 8, are compliant with the ASTM D-690I norm.

Techniques possible thanks to the permanent and smooth Luminance 6901® lead

- 1 Endless creation of colours thanks to the richness of the palette and the strong mixing capacity: with layering and/or with the white pencil.
- 2 Shading and burnishing to create volumes and 3D effects: by varying the pressure exerted on the pencil and by using the white pencil.
- 3 Maximum coverage: the support disappears thanks to a gentle, intense and uniform application with no blooming effect.
- 4 "Grisaille" technique by lightly pressing on the pencil: semi-transparent over a finished graphite drawing.
- 5 Sgraffito technique: intense colours are revealed by "scraping" with effects that vary from very fine to very broad.
- 6 Mixed technique with fiber-tipped pens: shade, unify or draw on felt-tip applications without "bleeding".
- 7 Creating on unconventional supports: the smoothness of Luminance 6901 allows you to dare a number of different supports.

Applying *Full Blender - Bright* adds brilliance and intensity to the colours. After polishing, the drawing takes on an extra dimension.

Discover the new
Full Blender - Bright on page 69

A wash beforehand with *Supracolor Soft* to tint the sheet of paper and give big volumes and base colours.

Artist's secrets

Nicole Caulfield realises a technical composition with 3 of Caran d'Ache's complementary leads: *Supracolor Soft*, (watercolour lead), *Pablo*, (dry and permanent lead) and *Luminance 6901*, (smooth and permanent lead).

Creation of undulating effects on the vase with *Supracolor Soft* using two techniques, "wet on wet" and "dry on wet".

Shading and paper volume effects with *Luminance 6901* that are applied without altering the watercolour parts. Dense colouring of certain parts of the vase to accentuate the volume and intensify shadows.

Pablo to **finish** the angles and provide detail.

MUSEUM Aquarelle

NEW

Extra-fine aquarelle in a pencil form

Very high pigment concentration

Exceptional lightfastness can be applied dry or water-soluble

- The extra-fine quality of MUSEUM AQUARELLE colour pencils makes them perfect for all the requirements of watercolour painting and artistic drawing.
- 76 colours, available in separate colours.
- Leads: Soft, Ø 3.8 mm, strong point.
- Exceptional colour fastness (standard Blue Wool Scale) (between ** and *****).
- Pencil: Hexagonal shape, 8 plys, top-quality cedar wood, easy sharpening, matt finish, matt colour cap matches the lead colour, identification number.
- 100% water-soluble immediately.
- High pigment density.
- Low powdering.
- Optimal transparency with no veiled effect.
- Brilliant and vibrant colours.
- Techniques:
 - watercolour, washes, crosshatching, graded applications, unlimited blending possibilities, mixed media.
 - dry or wet drawing on all supports (paper, cardboard, canvas, etc...).

Check out the Museum Aquarelle gift box on page 60.

Watercolours: lay down the palette of colours you want on dry paper. Pick them up with a moist brush and start painting.

Create blends by applying the paint on watercolour paper you have already moistened. As the colours spread you can produce some surprising effects.

Apply watercolour over a layer that has already dried to create a transparent or a glazed effect.

What is the Blue Wool Scale ?

An 8-point scale used to measure the lightfastness of colours based on their degree of fading after exposure to light. Our dry pastels have a lightfastness rating of between ** and ***** determined for the 76 colours of our Museum Aquarelle.

SUPRACOLOR® Soft Aquarelle

Soft and water-soluble lead

Excellent luminance/opaqueness ratio

Wide range of colours

- Superior-quality water-soluble colour pencils for the most exacting requirements: artists, illustrators, graphic art, art tuition.
- 120 colours, also available individually.
- Lead: water-soluble, soft, Ø 3.8 mm, high breaking-strength, very economical thanks to their exceptional covering power.
- Bright colours, excellent lightfastness.
- Shaft: hexagonal, end-sealed in the same colour as the lead, marked with colour name and code.
- Best cedar
- Certified FSC® Forest Stewardship Council
- Product conforms to ASTM D4236 (AP for USA only)
- Techniques: crosshatching, graded applications, water-colour effects, washes, unlimited blending possibilities, mixed media - can be combined with Pablo permanent colour pencils, Neocolor pastels and Gouache. Recommended for works on big surfaces.

For colour availability and assortments, see colour chart.

Draw and wash: draw the subject with Supracolor Soft then carefully work details or disperse the colours loosely with a moist brush. This brings out subtle tones and adds vibrancy to the subject.

Smudging: spray the drawing with water and smudge sections with a finger.

Powdered pigment: first draw the subject with a moist brush, then rub pigment off the pencil point onto the wet areas with sandpaper. Blow off loose pigment.

Dry and permanent lead resistant to any powder formation

Excellent luminance/opaqueness ratio

Wide range of colours

- Superior colour pencils for highest requirements: artists, illustrators, graphic art, art tuition.
- 120 colours, also available individually.
- Lead: soft water-resistant leads, Ø 3.7 mm, very economical thanks to their exceptional covering power, excellent lightfastness.
- Shaft: hexagonal, end-sealed in the same colour as the lead, marked with colour name and code.
- Best cedar.
- Techniques: shading, graded applications, mixed media, can be combined with Supracolor Soft Aquarelle and Neocolor pastels. Drawing on wood, photographs.

For colour availability and assortments, see colour chart.

Sketcher Non-photo blue pencil

- The Sketcher is a specific blue pencil with fine, soft and resistant lead allowing at once a delicate work and large work for basic sketches.
- It does not appear during the reproductions in black-and-white (scans, photocopies, etc.).
- Ideal for comic strips, animated films, cartoons and illustrations, etc.
- Easily erasable, the Sketcher of Caran d'Ache is the perfect pencil to correct sketches while maintaining the cleanliness of the lines.

Layering and hatching:

subtly graded hues applied locally in transparent or opaque layers create a natural, painterly look.

Brushing out:

lay down a design with Supracolor water-soluble colour pencils, apply a layer of Pablo on top, then work over the subject with a moist brush to bring out the design again.

Decoration:

the covering capacity and brilliance of Pablo permanent colour pencils achieve their full effect on various types of paper and other materials.

Check out the Pablo gift box on page 59.

PABLO® COLOUR CHART

Full Blender-Bright

- A universal colourless oil and wax-based medium for mixing, blending and intensifying colours.
- Gloss effect and colour protection. It forms a waterproof coating and increases protection against UV.

PASTEL PENCILS

NEW

Extra-fine dry pastels developed in close collaboration with master pastel artists

The widest palette of shades available identically in two complementary mediums: pencil and cube

Assortments of pencils, cubes and mixed meet the most demanding standards

- 84 colours available in sets of pastel pencils, themed sets (two mediums: cube and pencil), in a selection of 6 shades of cubes and individual pencils.
- Generous shading, high pigment concentration for rich and vibrant colours, powerful coverage.
- Pure colours, ultra-fine pigments.
- Exceptional lightfastness, conforming to standard Blue Wool Scale.
- Pencils: hexagonal, 8 plys, large 4.7 mm lead, strong point, best cedar wood, matt colour cap matches the lead colour, identification number.
- Cube: Dimensions: 6 x 83 mm, easy to handle, versatile: solid colour work (edges) or delicate work (corners), colour identification number.
- Product conforms to ASTM D4236 (AP for USA only)

The delicate lead of the pastel pencils requires the use of cutter.

For colour availability and assortments, see colour chart.

Check out the Pastel Pencils gift box on page 60.

Long matt cap with exactly the same colour as the pastel lead.

Pure colours, ultra-fine pigments.

Large (Ø 4.7 mm) resistant lead, best sharpened with sharp blade.

PASTEL PENCILS COLOUR CHART

What is the Blue Wool Scale ?

An 8-point scale used to measure the lightfastness of colours based on their degree of fading after exposure to light. Our dry pastels have a lightfastness rating of between ★★ and ★★★★★ determined for the 84 colours of our pastels.

Assortments			Minimum

788.312

A number of techniques are possible using the combination of Pastel Pencils and Pastel Cubes:

- Details and flat surfaces:** these two media with an identical colour range offer a wealth of lines, textures and combinations: use the point of the *Pastel Pencils* for detailed work and the sides of the *Pastel Cubes* for flat surfaces.
- Hatching:** play with overlaying, create volume and add strength to surfaces by drawing a series of lines more or less close together with the *Pastel Pencils* or the *Pastel Cubes*.
- Blurring:** blur the colours with a finger or a blending stick to soften a transition, create subtle mixes or produce dissolve effects.
- Erase:** tap lightly with the kneaded rubber to retouch, erase or lighten your drawings.
- Pointillage:** apply touches of colour different distances apart in different thicknesses and orientation to achieve a spotted effect.
- Water colour:** create watercolour backgrounds by adding water or turpentine.

Making a sky by blurring and overlaying conserving the pigment powders. The rich cameos of blue and light purple create subtle, soft gradations.

Capturing the shapes of petals with a finely sharpened Pastel Pencil. The hard lead delivers a clean, precise line.

The edges of *Pastel Cube* and the sharp *Pastel Pencil* are perfect for the detailing of flowers.

Different results can be achieved by using Pastel Cubes and Pastel Pencils of the same colour: covering a flat coloured surface with the *Pastel Cube* does not alter the sharpness of lines drawn with the *Pastel Pencil*.

PASTEL PENCILS AND PASTEL CUBES COLOUR CHART

Artist's secrets

Muriel Gutierrez uses the *Pastel Pencil* and the *Pastel Cube* to complement each other throughout her composition. She sharpens her *Pastel Pencil*, exposing a few centimetres of lead, and breaks her *Pastel Cubes* to play with all the flat surfaces and sharp edges.

NEOPASTEL®

NEW PACKAGING

Intense and uniform colours

Wide selection of colours

Excellent luminance/opaqueness ratio

- Very high-quality oil pastels for professional and amateur artist's requirements.
- Also recommended for advanced tuition.
- 96 colours, also available individually.
- Pastel: water-resistant colours, soft, non-powdery, soluble in turpentine (spirits of turpentine).
- Very high pigment concentration, economical in use thanks to the high covering capacity.
- Excellent colour stability.
- Excellent lightfastness.
- Product conforms to ASTM D4236 (AP for USA only).
- Techniques: unlimited colour blending possibilities, templates, impregnating and colouring, finger dragging. Also recommended for use on dark paper.
- Applicable on various supports (paper, cardboard, canvas, a.s.o.).

For colour availability and assortments, see colour chart.

Templates: apply the pastel around the edge of a smooth template. Rub the colours off the template onto the paper with your finger.

Sgraffito: overlay the colour then scratch the top layer with a knife or spatula.

NEOART™ Aquarelle

Pastel of large diametre recommended for works on big surfaces

Bright and semi-opaque colours

Very high pigment concentration

- Finest wax pastels for highest professional and artistic requirements. Excellent for watercolouring techniques.
- 60 colours, available in assortments and individually.
- Water-soluble wax pastels. Strong, bright semi-opaque colours of exceptional purity and intensity thanks to very high pigment concentrations.
- Excellent lightfastness.
- Techniques:
 - dry or wet drawing and painting on all supports (paper, cardboard, glass, a.s.o.)
 - watercolouring, washes, scraping back (sgraffito).

For colour availability and assortments, see colour chart.

Watercolouring and wash technique: rub a thick layer of Neoart vigorously onto a smooth palette and apply the colours with a moist brush to achieve a watercolour effect. Apply details direct with dry Neoart. Work details or spread the colour loosely with a moist brush. For strong accents, pick up pigment straight off the stick.

Sponging: apply different colours dry, then create dynamic blends with a moist sponge.

Rainbow technique: apply the various colours dry onto a smooth palette. Pick up the colours with a moist brush and transfer them sideways onto the paper.

Range for drawing and sketching

Mineral colours, warm tones

Uniform shading

- Sets of hard dry pastels and top-quality pencils for artistic use and professional drawing.
- ART by CARAN d'ACHE products are ideal for sketching, figure drawing and portraits.
- High-quality pigments
- Excellent lightfastness
- Techniques: painterly drawing, fine ruling, solids, line drawing, graded effects
- Charcoal drawings and hard dry pastel images can be fixed with the Caran d'Ache Fixative
- Because of the fragility of the pastel pencil leads and the synthetic charcoal, we advise sharpening these products with sandpaper.

Technical and artistic drawing

Technograph: The hard (H series) leads are intended chiefly for draughting work. The softer B grades are for freehand drawing.

2

4

ART by CARAN d'ACHE COLOUR CHART

Wash techniques: draw the subject with a *Technalo* water-soluble pencil, then work it with a moist brush as desired.

Sketching, smudging, dabbing out: on tinted paper, you can work up the subject step by step in very light or very dark blended tones using the standard range of dry pastels.

Sketching out and combining: natural charcoal is ideal for treating subjects in broad terms. Sanguine provides a lively, warm approach. All Art by Caran d'Ache products can be combined as desired.

776.310

Highly workable thermoplastic paste with a wax base

Never dries out or becomes hard

An infinite range of possibilities for three-dimensional artistic creations

- Ideal for artistic modelling, design, architecture, and animated films as well as for teaching and art physiotherapy.
- Stable up to 55°C and water-resistant.
- Ready to use and 100% reusable.
- Ideal choice of colours for teaching colour-mixing (570, 740, 670, 720, 300), and others intended for modelling and artistic sculpture (901, 496, 497, 542, 808).
- 10 brilliant colours available in 1 kg blocks.
- Adheres to any kind of support (paper, wood, cardboard, canvas, stone, metal etc...).

For colour availability and assortments, see colour chart.

Modelling by removing material:
sculpt from a block using a spatula to trace the outlines of the basic shape then cut away material as required.

MODEL'ART COLOURS CHART

Tools: structure and shape the piece with knives, chisels, spatulas, gouges, hammers, etc.
A Model'Art piece can be retouched or altered at any time.

A picture in relief: with the fingers, apply touches of Model'Art onto canvas or glass and spread it around. To create a relief picture, use Gouache or Acrylic, then cover it with a coating of rubber lacquer diluted in alcohol. The surface of the picture can be smoothed with a brush dipped in turpentine.

Colour mixing: play with the colours by mixing the primary colours to produce the secondaries. Add black or white to create lighter or darker shades, etc.

Hobbies

Dream of the world, recount his emotions with a single stroke, invent, experiment... A young artist draws like he breathes, expresses himself and is inspired thanks to colour, drawn by a limitless imagination.

Absolutely free, totally spontaneous, he plays with techniques by instinct, with no aim other than his own pleasure, with no constraint other than his creativity.

From the first pencil to the tube of gouache, from the generous selection received as a gift to the felt-tips for school, the Maison Caran d'Ache assists in every stage of exploring the world of shapes and colours with top-quality products specially designed for young artists.

Generations of children in Switzerland and all over the world have had the chance to learn to draw, paint or colour in using products manufactured by craftsmen in the Maison Caran d'Ache Geneva workshops.

As adults, they wish to offer their children the best of colour, quality tools suitable for their age, attractive and fun to develop their sense of beauty, their creativity and their talent.

Homogeneous colours allowing uniform tinted areas

High pigment concentration

Possibility of overlay of tints

- Superior-quality artists' pastels for the most exacting requirements: artists, illustrators, graphic art, art tuition.
- Recommended for creative (craft) activities.
- 60 colours, also available individually.
- Water-resistant artists' pastels, soft and easy to work, very economical thanks to their exceptional covering power, excellent lightfastness.
- Product conforms to ASTM D4236 (AP for USA only).
- Techniques:
 - Usable on various materials: paper, cardboard, glass, wood, leather, fabric, stone, a.s.o...
 - Soluble in turpentine (spirits of turpentine).
 - Encaustic on hot metal.
 - Can be combined with Neocolor II Watersoluble.

For colour availability and assortments, see colour chart.

Encaustic: place a sheet of heavy paper on a heated surface. Draw with *Neocolor I*, allowing the pastel to melt. Work in any remaining bits with a spatula.

Neocolor I, particularly the metallic colours, gives good, luminous coverage even on dark paper.

Scraping: apply a thick layer of clear *Neocolor I* onto smooth paper. Cover it with a thin layer of *Acrylic*. Let it dry then scrape back the surface to create the design required.

Special edition

In 1952, Caran d'Ache launched NEOCOLOR® I, the water-resistant wax pastel which revolutionised the teaching of drawing. To celebrate the 60th anniversary of this unique pastel, Caran d'Ache is releasing this unmissable, retro-design gift box.

7000.460

NEOCOLOR® II Watersoluble

NEOCOLOR® II COLOUR CHART

The widest range of wax-based water-soluble pastels on the market

High pigment concentration for bright and opaque colours

- Superior-quality water-soluble artists' pastels for the most exacting requirements: artists, illustrators, graphic art, art tuition.
- 126 colours, also available individually.
- Water-soluble artists' pastels, soft and easy to work, strong bright colours, very economical thanks to their exceptional covering power, excellent lightfastness.
- Product conforms to ASTM D4236 (AP for USA only).
- Techniques:
 - Dry or wet drawing on all materials
 - Watercolour effects, washes, scraping out
 - Suitable for use on (illuminated) signs and panels

For colour availability and assortments, see colour chart.

Rainbow technique: pick up the graded colours from a smooth palette and place the brush flat on the paper.

Watercolours: make a sketch, sprinkle it with water and allow the colours to dilute. Pick up colours from a palette and paint in wet as watercolour. Apply Neocolor II onto smooth paper and spread it onto the design with a stiff brush.

Wash and varnish: hold the pastel flat and draw on moistened paper. Colour the design with a brush full of Neocolor II. Cover the dry layers with a transparent layer.

Watercolour effects or a thick surface texture can be obtained depending on the amount of water used. Create special effects with a brush, sponge or cotton bud, a.s.o.

Paper batik: combine *Gouache* with *Neopastel* oil pastels.

Water-based designs: apply different patches of colour and work them with a flat piece of wood or painting knife. Thin films of paint produce stunning swirls of colour. Draw a design with water on your painting and scrape away the top layer.

Bright and transparent colours

Great length of writing (> 600 meters)

Does not dry out for up to one week with lid left off

Washable

- Superior quality, 3-year storage guarantee against drying out.
- Recommended for sketching out rough drafts, drawing instruction, and colouring.
- Water-based ink, water-soluble, ink does not penetrate the paper, washable on most modern fabrics.
- Product conforms to EN71 (CE).

FIBRALO®

- Fibre-tipped pens with medium-size point.
- 30 colours, also available individually.

FANCOLOR

- Fibre-tipped pens with medium or maxi size point.
- Food-based colours

METALLIC

- 3 luminous colours, covering power.
- Water-based ink.

For colour availability and assortments, see colour chart.

Beam and wash tint techniques: draw with several felt tips united in a beam. For water colour effects, wet and shade off. The stroke fuses, shines even more and acts like colour ink. Beautiful contrasts appear, due to the diffusion effect.

Sketching and colouring:

the *Fibralo* and *Fancolor* are ideal for architecture and concept sketching. The trait is clear and saturated, delivering the typical felt tip characteristics, specific to drawing.

For colouring in, apply the colour onto a non-absorbent surface and paint with a damp paint brush to realise a watercolour effect.

Stencils: follow the contours of your ready-cut stencil, with *Fibralo* or *Fancolor* felt tips. Remove the stencil and blur out the traits with a humid paint brush.

Other products

No detail should be left to chance...

Get the best results from a pencil by sharpening it perfectly. Give a drawing more depth by using the ideal kind of paper. Even out the colours or preserve a work by applying a fixative. Each technique needs the right accessory to release its full creative potential.

Ranging from brushes to mediums, from erasers to papers, Caran d'Ache accessories help to bring out all the artistic qualities of its products.

The Geneva Company has developed accessories to complement its paints, pastels and colour or graphite pencils. They perfect the application, enhance the beauty of the work... and leave no detail to chance.

GRAPHITE PENCILS

Graphite pencils, superior-quality leads

Best Cedar

For artistic and technical drawing, office and school use

- Grafwood: extra-fine graphite pencils, 15 graduations from 4H to 9B.
- Technalo: water-soluble lead. 3 hardness degrees HB-B-3B, available in cardboard box as well as individually. Excellent for sketching out paintings and for wash drawings.
- Black Wood: maxi graphite pencil, HB hardness degree, black matt varnish, large diameter lead Ø 4.5 mm
- Grafstone: pure graphite, 3 hardness degrees HB-3B-6B, available individually. Excellent for sketching.
- Technograph: 12 hardness degrees from 6B to 4H, available in metal box as well as individually.
- Swiss Wood: HB hardness degree, beech wood from Swiss Jura forest, matt water-based varnish, red cap decorated with a Swiss cross.

As part of its commitment for a sustainable development, Caran d'Ache has progressively FSC® certified some of its graphite pencils: Swiss Wood, Technalo, Technograph, Edelweiss, Natura and the pencil with eraser 351.

Full Blender-Bright

- A universal colourless oil and wax-based medium for mixing, blending and intensifying colours.
- Gloss effect and colour protection. It forms a waterproof coating and increases protection against UV.
- Hexagonal shape, economical to use – 100% of the blender can be used for a very wide choice of applications.
- Flexible use: sharpened like a pencil for detailed work or applied flat to cover large areas.
- Ideal complement to Caran d'Ache colour pencils, graphites and wax pastels.

903.302

Sketcher Non-photo blue pencil

- The Sketcher is a specific blue pencil with fine, soft and resistant lead allowing at once a delicate work and large work for basic sketches.
- It does not appear during the reproductions in black-and-white (scans, photocopies, etc.).
- Ideal for comic strips, animated films, cartoons and illustrations, etc.
- Easily erasable, the Sketcher of Caran d'Ache is the perfect pencil to correct sketches while maintaining the cleanliness of the lines.

NEW

Maxi Fluo

- 4 Maxi fluo pencils: yellow, orange, pink, green.
- Wax-based smooth texture that does not dry out.
- Water-based varnish.
- FSC® Forest Stewardship Council Certified.
- Generous, incomparable application, strong covering power.
- Ideal for a variety of creative activities (drawings, illustrations, scrapbooking) or for underlining texts (environmentally friendly, never dries out and does not run).
