

EXCLUSIVE WRITING INSTRUMENTS WITH INTEGRAL STAMP_

QUALITY AND DEMAND_

Many people appreciate exclusive writing instruments as a means of emphasising their individuality. Goldring is the expression of our efforts to meet this demand as fully as possible.

Lasting values provide you with a sense of security. Goldring writing instruments are characterised by timeless design, accuracy and reliability. The components, stamp mechanism and finishing processes comply with the highest quality standards.

OVERVIEW_

Even distribution of pressure on the textplate for a clean impression. There is room for a three or four-line textplate, depending on the model.

All moving parts are securely attached to the writing utensil – nothing can get lost.

Patented stamp mechanism is comfortable, easy and clean to use.

Standard cartridge made of high-quality tungsten carbide provides the best possible writing comfort. The life of the cartridge is more than 1000 metres.

WRITE_

Writing by hand gives your news a personal touch. Goldring writing instruments meet the highest demands for design and quality.

The repeater mechanism allows you to change smoothly with one hand between the writing and stamping functions. Simply push the cap of the pen downwards – the textplate automatically aligns itself horizontally ready for stamping. Pushing the cap up again closes the pen.

AND SEAL_

For stamping with the Classic Line you can choose between the three-line text plate (Automatic) or four-line text plate (Grandomatic and Delphin).

AUTOMATIC_

302120_ matt
black

TEXT PLATE SIZE_
max. 35mm x 9mm (4 lines of text)
textplate thickness: 1.5mm

MOUNTING OF TEXT PLATES_

To attach the text plate, release the stamp mechanism with the ink pad to the right.

Remove protective film.

Hold the textplate so that the text shows in reverse

Affix the text plate.

RE-INKING_

A few drops of ink are sufficient for a clear impression.

Do not over-ink the pad!

TOTAL QUALITY MANAGEMENT_

Trodat's quality policy is characterised by the principles and objectives that lead to consistent further development in terms of our employees, manufacturing processes and materials.

What are the implications for Trodat?

Our certification under EN ISO 9001 (since 21 June, 1995) ensures the highest degree of quality at all stages of processing.

Every single Goldring writing instrument is tested before it leaves our factory.

The inks used in the stamp pads are water-based, non-toxic and free of heavy metals.

Trodat products are protected by international patents.
